Journey of **AiTrillion**

Power of **integration**

AiTrillion becomes a more powerful platform due to the integration and sharing of data and triggers between all modules.

Few examples of how it works.

Loyalty program integrated with all modules

Customers can earn points if they leave a review. Based on tier system customers can earn double points for reviews too.

Automatic emails and push can be sent after customers reach an "X" number of points to redeem them before they expire.

Smart popups encourage customers to sign up and earn points.

Abandoned Cart Automation

Use AiTrillion to intelligently send email, web push, and smart popups to people who leave part-way through checkout. Due to multiple ways to reach customers, we see 2.5x more conversion of carts than any other platform.

Email marketing integrated with loyalty program and review

Customers will receive automatic emails for review request as well as reminders too. They also receive emails to redeem points once they reach the set number of points. Dynamic workflows can be created with many eCommerce based triggers to send emails as well as web push messages.

Review integrated with all modules:

Once the order is placed, automatic emails and push messages are sent to customers for review after the product is shipped. We can also send emails with loyalty points they earned once a review is submitted. Smart popups appear dynamically to customers after they purchase any product to leave a review.

Web Push integration with loyalty program and review

Customers will receive push messages for review request after product purchase. They will get push messages if they reach a set number of points to redeem it. Also, our dynamic push popup encourages customers to subscribe for push to earn points.

Smart Popups Integration

AiTrillion's popups are more powerful as they appear based on customer behavior and bring more conversions. AiTrillion also offers review popups, loyalty sign up popup, newsletter sign up popups, exit-intent popups, abandoned cart popups, as well as customized popups. Our smart popups can be easily integrated with email campaign list and work automation so you can send it just after form submissions.

Announcement Bar

Get the attention of your potential audience with automate announcement bars and drive more sales.

Create Announcement Bars like Free Shipping Bar, Offer Bar, Sales Motivator and any bars.

Flash your promotions with a fully customized bar on your online store. You can also design bar background images based on customer psychology and season to generate more sales. For designing personalized discounts and coupons, you need a complete view of your customer. However, if you're missing out on valuable customer insights, you are surely losing somewhere.

AiTrillion allows eCommerce stores to turn first time visitors into valuable customers by offering features like

- Customized Form Fields
- Timed Display Control
- Scroll based triggering

Announcement Bar

Showcase this bar for any notifications, free shipping, offers or sales on the store.

Countdown Timer Bar

Add urgency to your promotions or offers with the countdown timer.

Sales Motivator Bar

Motivate your customers to buy more from the store and reach the goal to get offer.

AiTrillion can help you append missing customer data too. Once you have a 360-degree view of your customers, you can create customized discount bars to effectively connect and engage with your audience.

Live Chat & Chatbot

Live Chat + Bots= Grow Your Sales

Create, Manage And Train Chatbot To Engage Your Customers.

AiTrillion helps you to connect to the right person at the right time in the right place. It also automates the workflow behind the scene and acts as an extension of your support team.

AiTrillion's chatbot is a must to have for eCommerce stores to welcome new visitors, boost your customer engagement, deliver personalized recommendations and much more. No matter how busy your team is, give customers instant answers 24/7 with our live ChatBot.

Collect information, understand customer behavior, and route conversations with Ai predictions. We care for our customers, their needs and we understand their time is precious. We believe in giving customers that level of engagement and satisfaction.

AiTrillions' ChatBot helps in:

- **Lead generation**
- **Customer engagement**
- **Customer support**
- **Customize bots without code**

AiTrillion's ChatBot is designed to communicate with your customers as well as visitors to answer all their frequently asked questions, alleviate pain points, and provide delightful customer experiences.

By the year 2021, according to a recent survey conducted by Oracle,

80% of businesses will want their own chatbots

60% of the youth population already uses chatbots daily.

Predictions

Map Your Customers Path With Ai Prediction

Features

Time Based Predictions	Day Based Predictions	Price Based Predictions
Repeat Customers	Location Based Predictions	

AiTrillion helps you predict your customers next move with the combination of data based on behavior and actions performed by the customer.

Ai Predictions Based on Various Touchpoints

With AiTrillion predictive analytics platform, you can now use past and current data to reliably forecast trends and behaviors of customers to maximize occupancy and revenue. Leverage powerful Ai predictions for well-defined segmentation to continue the personal conversations with your subscribers, visitors, and customers on the web.

Custom Audience

By Breaking Them Down Based On Distinctive Attributes.

Features

Price Based	Time Based	Product Based
Color Based	Frequent Visitors	Orders In A Month
Reviews Given	Loyalty Points	Order Value
Frequent Buyers	Visit Store	City
Country	Province (State)	Festive Products
Zip Code	Festival	

Target the relevant audience through his entire lifecycle by running triggers based on multiple predefined filters —

- Price
- Product
- Location – Country
- Province (State) and City
- Frequent buyers
- Store visits
- Festive Shoppers
- Loyalty Rewards
- Order value and many more.

The main motive of the Custom Audience feature for an eCommerce Seller is that one doesn't need to guess and worry about the communication that will be sent out and the targeted audience.

AiTrillion's Custom Audience feature allows you to create a tailor-made audience from your existing customer database. By tracking how each potential customer progresses along his journey and the touchpoints that the buyer completes, eCommerce sellers can more effectively influence people who have expressed interest in their products.

“

I would have to say that this is one of the best apps I have used through Shopify. If you want to combine all your apps into one app then this is the one. Cart Abandonment, Reviews, Loyalty Program, Push Notification, email and the list goes on. Well done on a great app

NitroSmile

“

My monthly expenses have fallen to a fraction. Replaces almost all important applications within a single system ... Reviews, abandoned cart, push notification, loyalty point management, etc. Customer service is fast and accurate. I highly recommend this app!
